

10.5003 LED TRAIL LUMINATOR BICYCLE LIGHT SYSTEM

Application

The Trail Luminator is designed for bicyclist who need lighting to illuminate a trail or for vehicle visibility. Features include a LED headlight, LED rear light, and a rechargeable battery.

Mounting Instructions

Front light is designed to be mounted on the handlebars of most bicycles. The handlebar clamps are partially installed before shipping for ease of mounting. Hardware needed is included. Rear light is designed for seat post mount (also comes partially installed). Mount the switch directly to the handlebar by strapping it securely with fastening wrap provided. For efficiency, keep it close to reach with a thumb, yet out of the way of the operation of the brake lever and gear changer.

The battery pack can be placed in a standard water bottle holder, where it should fit snugly.

Wire ties are included for securing cable to the frame to prevent accidental snagging.
